 - Secure eCommerce application design and development
 - Responsive and adaptive web application design
 - Analytics, operational intelligence and metrics integration
 - Mobile application and web integration with REST/SOAP service architectures
 - SDLC Methodologies - Agile (Scrum), Waterfall, Kanban
 - Security experience including PCI, PII, Sarbanes Oxley compliance
 - Languages and platforms - PHP, JavaScript, AngularJS, SQL, Node, ColdFusion, ASP.net, Java
-

Professional Experience

Tech Lead/Senior Web Developer - Walt Disney Parks and Resorts Online (Jan11-Current)

- Led diverse teams of developers, QA and engineers In Seattle, Orlando, Argentina and Philippines
- Developed REST and SOAP services for mobile and web consumption
- Tech lead for several successful projects on the Disney Cruise Line website
- Lead for MDX Platform - Focus to deliver Disneyland Paris website responsive development
- Worked closely and formed trusted relationships with business leadership, project management, creative, producers and most importantly my development team
- Responsible for interviewing web developers for my group
- Involved in evaluating new technologies and worked closely with Architecture
- Proven ability to deliver successful projects and dealing with the normal challenges that occur
- Stepped into a struggling Porthole project to turn it around and deliver the DCL enhancement
- Worked closely with the Analytics team to implement enhanced meta information and Omniture
- Demonstrated clear and timely communication and organization to drive better workflow
- Drive and implement effective solutions to benefit our timeline and budget
- Focused on efficient processes, including improving CICD, cloud delivery and development environments

Senior Internet Architect – The Seattle Times Company (Oct06-Jan11)

- Lead developer for data cloud project and open interface. Facilitated & led several projects using this data cloud interface – a couple examples are web services for new iPhone applications and Entertainment search/filter (worked with 3 developers and 3rd party development firm, used CodeIngiter framework and Smarty for templating)
- Worked closely with members of the newsroom to develop innovative news products

- Promoted development of extensible web services for potential reuse throughout the network
- Real Media OAS and Omniture integration and special advertisement technical implementation
- Drove multiple projects through the full life-cycle from requirements to deployment and support, using both waterfall and agile methodologies
- Worked closely with producers, designers and human factors to lead development with other engineers and contractors throughout projects. Developing both client-side and/or server-side solutions where best suited
- Designed, developed and implemented a photo management engine with extensive APIs for use throughout the Seattle Times network
- Member of Application Security Team focused on improving the security of our web applications and PCI compliance

Senior Internet Engineer – The Seattle Times Company (Nov04-Oct06)

- NWSources.com and Marketplace sites lead Engineer/Developer
- Development of integration with several 3rd party APIs
- Responsible for web server operations – Linux and Solaris with Apache
- Led development for redesign of NWautos.com (worked in tandem with a junior developer)
- Responsible for database design and optimization for web applications
- Developed and improved scheduled, automated data loading procedures

Network Security Consultant – Northwest Computer Support (Sep04-Nov04)

- Worked with clients to improve and fix network and application security
- Organized a suite of tools for security analysis

Web Server Administrator/Developer – Federal Home Loan Bank of Seattle (Feb01- Aug04)

- Managed all aspects of the bank's Internet technologies
- Responsible for all web servers (Win2003 IIS, Win2000 IIS, Apache), Windows clusters, SQL Servers, external and global DNS, and load balancing
- Provided 24x7 support for web applications requiring high-availability
- Automated existing procedures and unit tests to allow reliable monitoring of components
- Designed, led development and implemented custom CMS system (one other developer)
- Implemented high availability web infrastructure with load balancing and automatic fail-Over

Independent Contractor – GoldPress LLC (Aug99-Feb01)

- Led a small team of developers in many successful projects (2-3 developers)

Lead Web Developer – Freei.net/FreeInternet.com (Nov98-Sep99)

- Managed one junior developer
- Proven track record of completing projects ahead of schedule and under budget

Training

- Franklin Covey Leadership training
- Franklin Covey Project Management Training
- The Poynter Institute Technology and Journalism
- Real Media Open Adstream
- Many other relevant server and technology training (MySQL, Couchbase, Oracle DB, Oracle Application Server, CFM, Siteserver, RedHat RHEL, SUSE)

Certifications

- Certified Scrum Master
- CompTIA Security+
- Microsoft Certified Professional
- Currently working on PMP (PMI Project Management Professional) Certification
